Project Brief: Tennis

-Keerthana Kolisetty

I want to create a website on Tennis. I choose the topic of tennis because I play a lot of tennis and am familiar with the topic.

It will be similar to kind of a wiki with multiple links. Visitors can learn all about tennis. They can learn about the history of tennis, the rules, the equipment, the strategies and etc. I plan to use a lot of pictures. It will also have information on various famous tennis players. I also plan to have links that will lead to other websites about tennis for visitors to explore.
